**SEED
GROWERS**

Philadelphia, Pa.

Clinton, Iowa

[illegible]

Dear Friends:

There was such a tremendous demand for Burpee's Seeds last year that we had to refuse thousands of orders. In addition to the shortage of seeds, there was such a shortage of labor that we were unable to give the prompt service to which our customers have been accustomed.

Since last spring, we have grown more seed than in any other year in the 67 years of our business. Nevertheless, some kinds of seed are still in very short supply and others are entirely unavailable. This book lists all the varieties we can supply at the beginning of the season.

During the past summer, we have made many improvements in the handling, packing and shipping of orders from both Philadelphia and Clinton, Iowa. We are now in a position to fill orders promptly, but later in the season many varieties that we can now supply will be sold out.

We suggest that you send your order as soon as possible to the address nearest you, either Philadelphia, Pa., or Clinton, Iowa.

Victory Gardens will cover the nation this year. The demand for seed will be even greater than it was last year. Be ready for this demand with a full stock of the Best Seeds That Grow. We suggest that you order right now.

Faithfully yours,

David Burpee

President

This Book, Known as Burpee's Red List

is for the exclusive use of Seedsmen and Dealers who sell seeds and are therefore entitled to these Special Wholesale Prices. As a seedsman or dealer, you know the importance of good seeds; you cannot take chances on the quality of the seed from which you expect to make your profits. Sell Burpee's Tested Seeds—the Best Seeds That Grow.

Order Early from the Burpee Building Nearest You

The Burpee Buildings in Philadelphia, Pa., and Clinton, Iowa, are especially equipped to properly and quickly fill your orders. If you have not depended upon Burpee for your annual supply of seeds, do so this year; a trial order will be appreciated. It is our purpose to give you Quick Service and the Best Seeds at the lowest possible cost. Please remember that transportation of all kinds is slower than usual, so allow extra time for shipments to reach you.

Prices Subject to Change Without Notice

All prices in this wholesale catalog are subject to change without notice and all goods are offered f.o.b. Philadelphia, Pa., or Clinton, Iowa, and subject to prior sale. Due to bad weather conditions, seed crops were short last fall and, on top of this, there has been a tremendous demand for vegetable seeds. We advise that you order your requirements early. You cannot sell seeds if you do not have them on hand when your customer wants them.

A New Vegetable -

Burpee's TAMPALA

BETTER THAN SPINACH

1375 Burpee's Tampala (*Tăm-păl'-a*) is a delicious green vegetable, the leaves of which are cooked, prepared and served like spinach, but is better than spinach in many important respects.

Tampala is so different in flavor to other vegetables used as "greens" that it is difficult to compare it to any of them. It retains its tenderness for a longer time, has a consistency and flavor all its own, less irony and less puckery than spinach, more flavor, more body, and more food value than either spinach or chard—a pleasing change from all other "greens." It does well in hot weather and will keep on producing all summer.

Tampala leaves are so tender that they require only five minutes to cook, with only the water that clings to the leaves when washed. Branches 4 to 5 in. in length may be quickly gathered instead of picking individual leaves. These young stem tips and leaves may be cooked together; the larger stems, up to the size of one's little finger, may be separated from the leaves and cooked separately for 8 or 10 minutes as you would cook asparagus. The stems have a taste suggestive of artichokes. Young leaves, cut finely, make a refreshing salad. There are many ways to use this outstanding green leafy vegetable.

Tampala is not a new creation, but a newly recognized vegetable here. It has been enjoyed by the Chinese and the people of India for centuries.

Several years ago Rev. Earnest L. Lutz, a retired missionary, brought seed of this vegetable with him from Chungking, China, and gave some to David Burpee so that he might produce it in such quantities as to supply gardeners everywhere.

In China, the plant is known by several names, but these names are difficult to pronounce and not suitable for use in English or Spanish speaking countries. Therefore we have chosen the name "Tampala," by which it is known in India. Tampala is a horticultural variety of *Amaranthus gangeticus* L. We feel sure that you and your customers will like Tampala.

David Burpee picking branches of Tampala at Fordhook Farms

Tampala has an unusually long period of usefulness; it will not bolt or go to seed during hot weather. One sowing usually produces enough "greens" for the season. However, for a continuous supply of the most tender leaves, several successive sowings may be made 10 days or 2 weeks apart. Entire plants when they become 5 or 6 in. high make the most delicious greens, raw or cooked.

Tampala is easy to grow. Sow seed outdoors the same time you plant beans, or any time after the ground becomes warm. Tampala is ready to eat in from six to eight weeks after sowing the seed. Where plants are grown singly, 2 ft. apart, they make a large, round plant 1½ ft. and more across and 2 ft. high; use the 4 or 5 inch tips of each branch and repeated cuttings may be made as new leaves and stems grow.

1375 Burpee's Tampala—1/8 oz. 40¢; 1/4 oz. 75¢; oz. \$2.75; 1/4 lb. \$9.00; lb. \$27.00.

Burpee's FORDHOOK FARMS

Fordhook is the best known seed farm in the world. It was founded before the United States Government had any experiment stations. Here all varieties of vegetables and flowers are tested. Some of our favorite vegetables carry the name Fordhook. Our friends and fellow gardeners are always welcome at Fordhook and Floradale.

Burpee's FLORADALE FARMS

Floradale is the original seed farm of the Lompoc Valley of California. For years Floradale has been famous for the fine quality of flower seeds it produces. But since before Pearl Harbor it has also been producing the finest quality of many kinds of vegetable seeds that formerly came from Europe.

Burpee's vegetables are grown where soil and climate combine to produce highest quality seeds. Tests are made here, as well as at Fordhook, for purity and adaptability.

Mrs. August Belmont receiving from David Burpee a corsage of his new, deep orange Sweet Pea named for her in honor of her twenty-five years' work with The American Red Cross.

Burpee's Early Flowering Sweet Peas

Varieties are arranged in each color class from deep to light shades

Burpee's Early Flowering Sweet Peas come into bloom outdoors before the summer heat arrives—3 to 4 weeks earlier than the Giant Spencer varieties offered on pages 56 to 60. They are valuable for winter flowering under glass, also especially adapted for growing in frost-free sections and for earliest blooms outdoors in the North. Sweet Peas do best in cool weather. If seed was not sown in the fall, sow as early in the spring as the ground can be prepared. They prefer an open, sunny location, and deep, rich soil which must be well drained.

White

3390 Burpee's White Magnificent large, frilled, pure glistening white flowers which are particularly sweet-scented. A splendid white-seeded white.

3395 White Giant* Flowers are extremely large, of the purest white, and perfectly placed in fours on long, strong stems. An extra choice white-seeded white.

Cream

3334 Oriental Deep cream or primrose flowers of large size and unusual beauty. Black-seeded.

Fawn Pink

3162 Golden Pink* Outstanding color—glowing golden or fawn pink; beautiful, especially under artificial light. Large, well-waved flowers.
